Assignment – 14

Entering, Deleting, and Changing Field Values.

1) Write a command that puts the following values, in their given order, into the salespeople table: city – San Jose, name – Blanco, comm – NULL, cnum – 1100.

Ans:-

```
KD3_86718_yagywalky@>insert into salespeople(city,sname,comm,snum)
    -> values('San Jose', 'Blanco', null, 1100);
Query OK, 1 row affected (0.02 sec)
KD3_86718_yagywalky@>select * from salespeople;
                   City
  Snum
         Sname
                                Comm
                   London
  1001
         Peel
                                0.12
                                0.13
  1002
                   San Jose
         Serres
  1004
         Motika
                   London
                                0.11
  1007
         Rifkin
                   Barcelona
                                0.15
                   New York
  1003
         Axelrod
                                0.10
                   San Jose
  1100
         Blanco
                                NULL
  rows in set (0.00 sec)
```

2) Write a command that removes all orders from customer Clemens from the Orders table.

Ans:-

```
KD3_86718_yagywalky@>delete from orders
    -> where cnum = (select cnum from customers where cname = 'clemens');
Query OK, 2 rows affected (0.01 sec)
KD3_86718_yagywalky@>select * from orders;
  Onum
         Amt
                   0date
                                 Cnum
